~/profile

Today I build complete systems, from the database to the interface, and ship my own products under Spiicy Labs.

~/experience

2026 - now	Software Developer · Cooperativa Hispánica (remote)
2026	Spiicy Labs · Authsidian and Trébol Trébol — Multi-tenant SaaS for Dominican lottery points of sale: API, admin web panel and an iOS/Android app with Bluetooth thermal printing. Live on the App Store. Authsidian — Zero-knowledge password and secrets manager: API keys, .p8 certificates and .env files encrypted on device. The server only ever holds ciphertext.
2024	Freelance · Quantech Quantech — Platform for the Dominican capital market. In its next phase I migrated the Power BI Embedded dashboards to native web charts.
2023 - 2024	Software Developer · ProDominicana 🏆 WTPO Awards 2024 · Best Use of IT, 2nd place ProDominicana — The Dominican Government's official export and investment portal. Full backend, admin shell and public-site views. ProInteligencia — Trade-intelligence platform with international trade and FDI tools. Full backend, admin shell and views.

~/stack

Interface	Next.js · React · Expo · React Native · Astro · HeroUI · Tauri · Three.js
Server	TypeScript · NestJS · Node.js · Go · Rust
Data	PostgreSQL · Prisma · Power BI · Redis
Infrastructure	Docker · EAS · Render · Turborepo · Vercel
Quality and delivery	Jest · CircleCI · GitHub Actions · Node test runner · Playwright · Vitest
Security	AES-256-GCM · Argon2id · Multi-tenant · Zero-knowledge

~/education

2019 - 2024	B.S. Systems and Computer Engineering · PUCMM
-------------	--

~/languages

Spanish: native · English: B2 (conversational)
